

Metal Shovel Head for Digging and Material Handling

This shovel head is made from durable metal, ensuring long-lasting performance for various digging and material handling tasks. It features a wide blade for efficient scooping and a reinforced connection point for secure attachment to a handle.

Product Overview

Professional Grade Metal Shovel Head

This durable metal shovel head is engineered for demanding digging and material handling tasks. Built to withstand rigorous daily use, it features a wide blade optimized for maximum scooping efficiency in gardening, construction, and landscaping projects. The reinforced connection point ensures a secure and stable attachment to your handle for reliable performance under load.

Technical Specifications

Key Design Elements

- Wide blade for efficient scooping
- Reinforced connection point
- Heavy-duty construction

Material

Robust Metal

Applications

Suitable Industries

Gardening, Construction, Landscaping
