

Metal Stamping Dies

These metal stamping dies are designed for metal forming machinery. Constructed from cast metal, the dies are suitable for repeated use in industrial stamping processes.

Product Overview

Industrial Metal Stamping Dies

These professional-grade metal stamping dies are engineered for durability and precision in high-volume industrial metal forming applications. Constructed from high-strength cast metal, they are designed to withstand the rigorous stresses of repeated manufacturing cycles. Each die features clear alphanumeric identification for seamless integration into existing production workflows and inventory tracking systems.

Technical Details

Primary Application

Metal Forming • Industrial Stamping

Part Number Identification

20-0003, 10505665

Material Composition

Cast metal (iron-based)
