

Metal Stamping Printer Part

This precision-engineered metal stamping printer part is designed for use in printing machinery. It features a circular design with evenly spaced peripheral teeth and multiple circular perforations.

Product Overview

Precision Metal Stamping Component

This precision-engineered metal stamping part is designed for high-performance applications in printing machinery. Crafted with attention to detail, it features a circular design with evenly spaced peripheral teeth and a central keyed bore, ensuring reliable integration within complex mechanical systems. Built for durability and accuracy, this component is suitable for demanding industrial environments.

Technical Capabilities

Production Equipment Summary

Equipment Type	Quantity
16T-60T Punching Press	16
45T Multi-station Punch Press	16
160T Precision Press	3
15T-80T High-speed Press	8
5T-200T Punching Press	24

Stamping Processes

Deep Drawing, Extruding, Piercing, Coining, Reverse Burring, Blanking, Forming, Embossing

Applications

Typical Applications

- Printer Parts
- Copier Parts
- EPS Steering Motor Steel Housing
- Automobile Sensor Signal Wheel
- Shock Absorber Signal Wheel
- Automobile Engine Signal Wheel
- Lithium-ion Battery Housing
- Electron Gun Metal Stamping Parts

Production Capacity

Total Processing Units	115 units
