

Metallurgy Machinery

Metallurgy machinery is used for processing and shaping metals. These machines play a crucial role in metal treatment and manufacturing processes.

Product Overview

Professional Measuring Tool

This 5-meter measuring tape is designed for precision and durability in professional environments. Featuring both metric and imperial units, it offers versatile measurement capabilities for various construction and manufacturing tasks. The tool includes a robust metallic casing with a rubberized grip for secure handling and a convenient locking mechanism for accurate readings.

Technical Details

Tape Length	5 m
Imperial Length	16 ft
Model Number	MR-5215

Features

Key Features

- Metric and Imperial scales
- Integrated LED light
- Locking mechanism
- Belt clip
- Rubberized grip

Design & Build

Casing Material	Metallic with black rubberized grip
Convenience Features	Locking Mechanism, Belt Clip, Integrated LED
