

Metalworking Lathe with Variable Speed Control

This lathe machine features a 520mm swing. Center distance options include 1,000mm, 1,500mm, 2,000mm, and 3,000mm.

Overview

Precision Metalworking Lathe

This precision lathe machine is expertly designed for diverse metalworking and machining operations. Its robust construction ensures maximum stability and accuracy during use, while the integrated variable speed control allows for seamless adaptation to various materials and tasks. It is a versatile solution capable of handling turning, facing, threading, and drilling with ease.

Technical Capabilities

Speed Control

Variable Speed

Supported Operations

Turning, Facing, Threading, Drilling
