

Meter Gauge Railway Bogie 14T

This meter gauge bogie is designed for railway vehicles with 14-ton axle loads. It offers a durable frame, resilient suspension, and reliable braking for optimal performance.

Overview

Robust Engineering for Meter Gauge Tracks

The 14 Tons Meter Gauge Bogie is a high-performance component designed specifically for railway vehicles operating on meter gauge tracks. Engineered to support a maximum axle load of 14 tons, it ensures safe and reliable transport for both freight wagons and passenger coaches. Its durable frame construction and integrated suspension system provide exceptional ride quality and longevity in demanding railway environments.

Technical Specifications

Maximum Axle Load

14 Tons

Max Axle Load

Suspension System

- Coil springs
- Dampers

Track Gauge Compatibility

Meter Gauge

Compliance & Application

Standards Compliance

International Standards

Suitable Applications

Freight Wagons, Passenger Coaches
