

Micro Precision Electric Grinder

This micro precision electric grinder is designed for detailed work. It can be used for nail and wood engraving, craft carving, denture polishing, mould polishing, and circuit board drilling.

Product Overview

Precision Grinding Solution

The Micro Precision Electric Grinder is a versatile tool engineered for high-accuracy tasks across various industries. Designed with a compact control unit and a flexible handpiece, it offers excellent maneuverability for detailed work. This system supports variable speed control and hands-free operation via a foot pedal, making it an essential asset for precision grinding, polishing, and shaping applications.

Applications

Primary Applications

Nail Art, Wood Engraving, Craft Carving, Denture Polishing, Artificial Limb Polishing, Mould Polishing, Precision Parts Carving, Circuit Board Drilling

Technical Features

Control Features

- Variable speed control
- Foot pedal for hands-free operation
- Compact control unit
- Integrated power and speed indicators

Model Identifier

JD7500
