

Microwave Sensor LED Ceiling Light

This ceiling light features a microwave sensor for automatic on/off control. It is ideal for corridors and hallways, providing energy-efficient and convenient lighting.

Product Overview

Intelligent Illumination for Modern Spaces

This intelligent ceiling light features a built-in microwave sensor for automatic on/off control, making it ideal for corridors, hallways, and other areas where hands-free operation is desired. The microwave sensor detects motion and triggers the light to turn on, automatically powering down after a pre-set period of inactivity. This energy-efficient design helps reduce electricity consumption while providing bright, even illumination for residential, commercial, and industrial settings.

Technical Features

Sensor Technology	Microwave Sensor
Operation	Automatic Motion Detection
Suitable Environments	Residential, Commercial, Industrial, Corridors, Hallways

Key Benefits

Key Performance Indicators

1 Yes Energy Efficient	1 Yes Hands-Free Operation
