

MIG/MAG Welding Machines

These are MIG/MAG welding machines used for welding. The machines feature a power switch, adjustable settings, welding torches, and ground clamps.

Overview

Professional MIG/MAG Welding Solutions

These versatile welding machines are designed for efficient MIG/MAG welding processes, catering to various fabrication needs. Each unit comes fully equipped with a welding torch, ground clamp, and input power cable, ensuring a ready-to-use setup for operators. Featuring intuitive power switches and adjustable settings, these machines provide precise control for consistent weld quality across different applications.

Technical Specifications

Included Equipment

- Welding torch
- Ground clamp
- Input power cable

Control Features

Adjustable settings • Power switch

Welding Process

MIG, MAG
