Product Overview

Versatile Mini Excavator Buckets

These high-durability buckets are engineered for excavators ranging from 0.8 to 8 tons. Constructed from high-strength steel, they feature reinforced cutting edges and robust mounting systems designed to withstand demanding digging conditions in sand, mud, and general construction materials. The bolt-on teeth system enhances maintenance efficiency compared to traditional welded adapters, ensuring longer operational life.

Technical Specifications

Compatible Excavator Weight

0.8 Ton

Minimum Weight

8 Ton

Maximum Weight

Key Features

Bolt-on Teeth System, High-Strength Steel, Reinforced Cutting Edge, Optional Side Cutter, Corrosion Resistant Finish

Compatibility

Mounting Styles

Lehnhoff Style

Primary Applications

- Digging sand
- Mud removal
- General construction
- Landscaping
- Trenching
