

Mini Garden Power Tiller

This mini garden power tiller is a compact machine designed for soil preparation and cultivation. Equipped with a 15.0 horsepower engine, it efficiently tills soil for planting.

Product Overview

Compact Power for Soil Cultivation

This mini garden power tiller is a compact, high-performance machine engineered for efficient soil preparation in gardens and small-scale farming environments. Featuring a robust 15.0 horsepower engine, it provides the necessary power to handle various soil types with ease. Its adjustable tilling depth and width capabilities, combined with an ergonomic design, make it a versatile tool for maintaining seedbeds, vegetable gardens, and flower beds.

Technical Specifications

Engine Power

15 HP

Engine Power

Key Operational Features

- Adjustable tilling depth
- Adjustable tilling width
- User-friendly control panel
- Ergonomic handles

Design Benefits

Compact Design • Easy Maneuverability • Robust Construction

Ideal Applications

Seedbed preparation, Vegetable garden cultivation, Flower bed maintenance
