Product Overview

Versatile Mini Wheel Loader for Diverse Applications

The ZL928 Mini Wheel Loader is a high-efficiency earthwork machine designed for rapid operation and excellent maneuverability in confined spaces. This versatile loader is widely used in highway, railway, construction, and agricultural projects for shoveling bulk materials like soil, sand, and coal. Equipped with a specialized grass fork, it excels at handling hay and other agricultural materials, making it an ideal solution for farms and landscaping.

Performance Highlights

Key Performance Metrics

1800 kg
Rated Load

0.9 m3
Bucket Capacity

3500 mm
Dumping Height

Technical Specifications

Rated Parameters

Item	Value	Unit
Rated Load	1800	kg
Rated Bucket Capacity	0.9	m3
Total Weight	5300	kg
Dumping Height	3500	mm

Product Advantages

Operational Benefits

- Fast operation and high efficiency
- Good maneuverability in tight spaces
- Simple and portable operation
- Versatile auxiliary device support

Applications

Common Applications

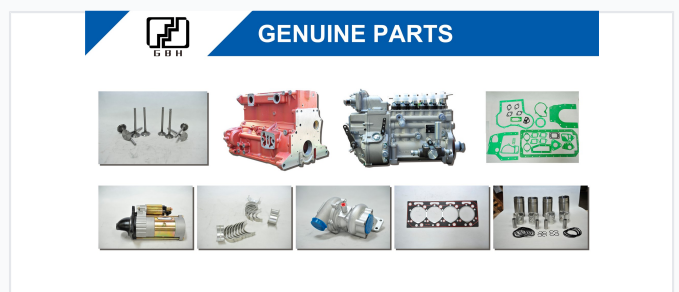

Highway Construction, Railway Projects, Hydropower, Port Logistics, Mining, Agriculture, Landscaping

Compliance & Quality

Standards & Certifications

ISO 9001:2015 • CE Certified • Machinery Directive 2006/42/EC

Engine & Components

Engine Series Support

- 490 Series
- 495 Series
- R105 Series
- HD6126 Series
- HD6D51 Series
