

# Miniature Automotive Light Bulb

This miniature bulb is designed for automotive lighting. It features a robust filament for reliable performance and a standardized base for easy installation.

## Product Overview

### Reliable Automotive Illumination

This miniature automotive light bulb is engineered for consistent performance across a variety of vehicle lighting applications. Featuring a robust filament construction, it offers an extended lifespan and high reliability for demanding automotive environments. Its compact design and standardized base allow for seamless installation, making it an ideal choice for interior lighting, dashboard illumination, and other low-power signaling needs.

## Technical Specifications

### Key Design Features

- Robust filament construction
- Extended service lifespan
- Standardized base for compatibility
- Compact form factor

### Primary Applications

Interior Lighting, Dashboard Illumination, Low-Power Signaling

### Installation

Standardized base for easy replacement
