Overview

High Performance Protection

This high-performance miniature circuit breaker is designed for terminal distribution circuits in commercial, residential, and industrial environments. It provides reliable overload and short-circuit protection while enabling infrequent switching operations. The unit features finger-touch protection, clear contact status indicators, and modular accessory compatibility for enhanced safety and versatility.

Electrical Specifications

Rated Voltage	230 / 400V
Rated Current Range	63 A
Operating Frequency	50 / 60 Hz
Number of Poles	3
Tripping Characteristics	Type B, Type C, Type D, Type K

Standards & Compliance

Certifications

VDE • CCC • CB • CE

Compliance Standards

- GB 10963.1
- IEC/EN 60898-1
- GB 14048.2
- IEC/EN 60947-2

Design & Configuration

Front Face Options

- Flat
- Rocker (without label cover)
- Rocker (with label cover)

Safety Features

Finger touch protection, Contact closure indicator, Disconnection indicator
