

Miniature Circuit Breaker MCB-DZ47-63H

This miniature circuit breaker is designed for 240/415V electrical systems operating at 50/60Hz. It provides overload and short-circuit protection and complies with IEC/EN60898-1 standards.

Overview

Professional Circuit Protection

The DZ47-63H Miniature Circuit Breaker provides essential overload and short-circuit protection for electrical lines in residential, commercial, and industrial environments. Engineered for versatility, it supports AC 50/60Hz systems and is suitable for both standard protection and infrequent circuit switching. This device ensures reliable performance and safety in diverse applications ranging from civil residences to high-rise buildings.

Electrical Ratings

Rated Voltage	230/400V
Rated Current	63 A
Frequency	50/60Hz
