

Miniature DC Air Pump for Medical Nebulizers and Suction Devices

This DC air pump is designed for use in portable nebulizers, vacuum packing machines, water flossers, and blenders. The pump provides consistent performance and is engineered for low noise and vibration.

Product Overview

High-Performance Miniature DC Air Pump

This miniature DC air pump is engineered specifically for medical applications such as nebulizers and suction devices. It features a compact, durable design that ensures reliable and consistent performance, even in demanding environments. Designed for low noise and vibration, it provides precise air flow control, making it an ideal component for sensitive medical equipment requiring longevity and efficiency.

Technical Specifications

Key Features

- Compact design for space-constrained devices
- Low noise and vibration operation
- Precise air pressure and flow control
- Durable construction for long service life

Primary Applications

Medical Nebulizers, Suction Devices, Medical Equipment

Quality & Compliance

Certifications & Standards

CE • UL • VDE • 3C • ISO 9001 • ISO 14001 • RoHS • REACH
