

Mining Electrical Distribution Cabinet

Electrical distribution cabinet designed for mineral processing and mining applications. It features robust construction, multiple circuit breakers, and a weatherproof enclosure.

Product Overview

Robust Power Distribution for Mining

This electrical distribution cabinet is specifically engineered for mineral processing and demanding mining applications. Designed with a weatherproof enclosure, it ensures reliable power distribution and protection for heavy machinery in challenging outdoor industrial environments. The unit features a robust construction and a lockable access door, prioritizing both equipment longevity and operational safety.

Technical Specifications

Enclosure Features

Weatherproof • Robust Construction • Lockable Access

Included Components

- Multiple circuit breakers
- Weatherproof enclosure
- Lockable access door

Application Environment

Mining, Mineral Processing, Outdoor Industrial

Safety Compliance

Yes
