

Miter Saw

This miter saw is designed for cutting wood and other materials. It features a rotating base for angled cuts and a tilting head for bevel cuts.

Overview

Precision Cutting Solution

This versatile miter saw is engineered for high-performance cutting across wood and various other materials. It features a robust design with a rotating base for precise angled cuts and a tilting head for complex bevel cuts. Equipped with an integrated blade guard and a high-torque motor, it ensures both operational safety and efficient, clean cuts for professional applications.

Key Features

Capabilities

Angled Cuts, Bevel Cuts, Woodworking, High-Torque Motor

Safety & Design

Safety Equipment

- Integrated blade guard
- Sturdy base construction

Performance

Cutting Performance

360 degrees

Base Rotation Range

45 degrees

Max Bevel Angle
