

MMA Welding Machine

MMA welding machine designed for manual metal arc welding processes. It provides stable arc characteristics, efficient power conversion, and is suitable for diverse applications.

Product Overview

Professional MMA Welding Solution

This high-performance welding machine is engineered for Manual Metal Arc (MMA) welding processes, delivering stable arc characteristics and efficient power conversion. Designed for industrial environments, it features robust construction, adjustable current settings, and thermal overload protection to ensure safety and reliability. With user-friendly controls and a digital display, it allows for precise parameter adjustments when welding steel, stainless steel, or cast iron.

Technical Specifications

Compatible Materials

- Steel
- Stainless Steel
- Cast Iron

Available Models

MMA-250, MMA-315, MMA-400

Performance Features

Key Capabilities

Stable Arc • Thermal Overload Protection • Digital Display • Industrial Grade
