Product Overview

Compact MMA Welding Solution

This series of MMA welding machines is designed for portability and reliable performance across a range of welding applications. Featuring adjustable current control, these units are suitable for light fabrication, repair work, and general maintenance tasks. Each machine is built with robust construction to withstand demanding work environments and includes thermal overload protection for safe, consistent operation.

Technical Specifications

Available Models

- MMA-160P
- MMA-180P
- MMA-200P
- MMA-250P

Performance Metrics

160 A

Base Model Current

Safety Features

Thermal Overload Protection, Robust Construction
