Product Overview

Versatile Climate Control Solution

This compact and elegant mobile air conditioning unit provides a comprehensive climate control solution, functioning as an air conditioner, fan cooler, dehumidifier, and heater. Designed for both office and home environments, it features a self-evaporative system and high energy efficiency to ensure optimal performance. The unit is engineered for user convenience with electronic controls, a 24-hour timer, and a patented exhaust outlet design for easy installation.

Technical Specifications

Key Features

- Air outlet upward with auto-swing function
- Self-evaporative system for condensate recycling
- High cooling and heating capacity
- Low noise operation

Refrigerant Compatibility

R410a, R290 (European Market)

Control & Usability

Control Interface

Electronic Controls • LCD Display • Remote Control Included

Timer

24 hours
