

Mobile Concrete Mixing Plant

This mobile concrete mixing plant is designed for efficient on-site concrete production. It features aggregate storage bins, a conveyor system, a central mixing unit, and a discharge system, all mounted on a wheeled chassis.

Product Overview

High-Efficiency Mobile Concrete Solution

This mobile concrete mixing plant is engineered for rapid deployment and efficient on-site concrete production. Built on a robust wheeled chassis, it offers seamless transportation between construction sites, minimizing setup time and logistical overhead. The integrated system combines aggregate storage, material transfer, and automated mixing to ensure consistent, high-quality concrete output for various project requirements.

Key Features

Integrated Systems

- Aggregate storage bins
- Conveyor material transfer system
- Central mixing unit
- Automated discharge system
- Cement storage silos
- Automated control system

Mobility Features

Wheeled Chassis, Rapid Setup, On-site Portability

Performance

Control System

Automated Batching • Automated Mixing
