

Mobile Diesel Generator Lighting Tower

This mobile lighting tower is equipped with a diesel generator to power its high-intensity floodlights. It is designed for illuminating large areas at construction sites, emergency response scenarios, and outdoor events.

Product Overview

Mobile Lighting Solution

This mobile lighting tower is a versatile solution designed for illuminating large areas in demanding environments such as construction sites, emergency response operations, and outdoor events. Featuring a robust diesel generator and an extendable mast, it ensures reliable power and precise light direction for extended operation. Built with a durable chassis and wheels, the unit is engineered for easy transportation and rapid deployment wherever high-intensity lighting is required.

Technical Specifications

Operational Capabilities

- Extendable mast for height adjustment
- Adjustable light direction
- Extended operation capability
- Suitable for outdoor events
- Suitable for construction sites
- Suitable for emergency response

Power Source	Diesel Generator
Lighting Type	Dual High-Intensity Floodlights
Mobility Features	Robust Chassis, Wheeled Base, Mobile Design
