

Mobile Diesel Generator Power Station for Trucks

This mobile power station is mounted on a truck chassis. It uses a diesel generator for reliable electricity generation in remote locations or during power outages.

Overview

Mobile Power Solution for Emergency Deployment

This mobile diesel generator power station is expertly integrated onto a truck chassis, offering a versatile solution for long-distance, rapid emergency power supply. Designed to withstand harsh conditions, the unit is rainproof, snowproof, and dustproof, ensuring reliable operation in outdoor environments. Its user-centric design promotes ease of use while prioritizing safety with integrated fire suppression and emergency shutdown features.

Technical Performance

Noise Level

68 dB(A)

Min Noise Level

85 dB(A)

Max Noise Level

Environmental Protection

Rainproof, Snowproof, Dustproof

Safety Features

Safety Equipment

- Integrated fire extinguisher
- Compartment emergency stop switches
- Human-oriented design for safe operation

Design and Compatibility

Customization

Customized trailer genset configuration available for various van brands.
