Product Overview

Mobile Diesel Generator Welder

This mobile diesel generator and welding machine set is designed for on-site power generation and welding applications, allowing for operation without mains electricity. The unit features a robust diesel engine coupled with an electrical generator and welding unit, all mounted on a wheeled trailer for easy transportation and maneuverability. It is an ideal solution for construction sites, remote locations, and emergency power situations where reliable electrical power and metal joining capabilities are required.

Technical Specifications

Welding Current Range

50 A

Minimum Current

400 A

Maximum Current

Power Output

30 KW

Features & Accessories

Standard Accessories

- Welding guns
- Cables
- Protective caps

Mobility & Design

Wheeled Trailer, Adjustable Support Legs, Protective Housing, Hinged Access Panels
