

# Mobile Diesel Power Generator

This mobile diesel generator is mounted on a trailer for easy transportation. It is designed to provide portable power for construction sites, outdoor events, and emergency backup.

## Overview

### Mobile Diesel Power Generator Solutions

This versatile mobile diesel generator set is engineered for high operational capability and safety across various industrial applications. Available in multiple configurations including trailer-mounted and containerized versions, it provides reliable power for construction sites, events, and emergency needs. The unit features a robust, soundproof design with advanced safety mechanisms such as active traction and hydraulic stabilization for ease of deployment.

## Technical Features

### Operational Noise Level

**68 dB(A)**

Minimum Noise Level

### Mobility & Safety

Active Traction, 360-degree Steering, Air Brake Interface, Hand-brake System, Hydraulic Stability

## Construction & Design

### Enclosure Specifications

- Ventilated front windows
- Folio doors at the rear
- Side operator access doors
- Polyurethane polymer exterior paint
- Bottom-mounted vent pipe

## Operational Environment

### Internal Equipment

Component	Function
Explosion-proof lights	Top-mounted illumination
Operating table lamp	Task lighting for operators

## Mobility Configurations

### Available Structure Types

Hand-pushed • Three-wheel • Four-wheel • Automobile Plant • Trailer Station • Containerized
