Overview

Smart Mobile Sanitization Solution

This mobile disinfection channel trailer offers a comprehensive solution for rapid deployment in high-traffic areas, events, and public spaces. Combining automated temperature screening with an efficient disinfection tunnel, the unit ensures a safe and hygienic environment for individuals. Designed for mobility and ease of use, it features a non-slip ramp and durable construction suitable for outdoor operations.

Key Features

Core Functionality

- Automated temperature screening
- Automated disinfectant spraying mechanism
- Human presence sensor detection
- Mobile trailer design for rapid deployment
- Non-slip access ramp
