

Mobile Equipment Enclosure with Ventilation

This mobile enclosure is designed to house and protect equipment in industrial and laboratory settings. It features a lockable door, ventilation grills, and a wheeled base for easy relocation.

Product Overview

Mobile Equipment Enclosure

This mobile equipment enclosure is engineered for industrial and laboratory environments where mobility and internal component protection are essential. It features a robust construction designed to house delicate electronic or mechanical equipment safely while maintaining operational efficiency. The integrated ventilation system ensures optimal cooling to prevent overheating during continuous operation.

Key Features

Mobility & Access	Wheeled Base, Front Access Door, Industrial Design
Cooling System	Yes

Specifications

Suitable Applications

- Industrial Facilities
- Laboratory Settings
- Equipment Protection

Construction	Robust Enclosure
