

Mobile Hydrogen Fuel Cell Power System

This mobile hydrogen fuel cell power system is designed for a variety of applications. It provides clean and efficient power generation using hydrogen fuel and includes dual power outlets, USB ports, and a digital display.

Product Overview

Clean Mobile Power Solution

This mobile hydrogen fuel cell power system is engineered to provide reliable, clean energy for diverse field applications. Designed for portability, the unit is mounted on wheels and features a ruggedized exterior capable of withstanding demanding environments. It integrates essential power interfaces including dual power outlets and USB ports, supported by an intuitive digital display and precise pressure monitoring for safe operation.

Technical Features

Power Interfaces

- Dual power outlets
- USB ports
- Digital display
- Pressure gauge

Safety Features

Emergency stop button, Pressure monitoring

Design & Portability

Exterior Finish

Ruggedized • Camouflage

Mobility

Wheel-mounted mobile unit
