

# Mobile Light Tower for Construction and Emergency Use

This mobile light tower features a compact structure and lightweight design for easy transport. Its optimized lifting rod and strong installation ensure wind resistance and reliable lighting in various working conditions.

## ADDITIONAL IMAGES

## Product Overview

### Versatile Mobile Lighting Solution

This mobile light tower is engineered for demanding environments, offering reliable illumination for construction sites, emergency response, and large-scale outdoor events. Featuring a flexible telescopic mast system and multiple power configurations, it ensures high visibility and operational safety. Designed for user-friendly deployment, the unit includes options for manual or automated lifting and is built for easy transport by a single operator.

## Mast & Lighting

### Lifting Mechanisms

- Manual
- Electric
- Pneumatic
- Hydraulic

### Lamp Options

Metal Halide • LED

### Mast Height Range

4.5 - 9 meters

### Mast Material

Aluminium Alloy, Galvanized Steel

## Operational Features

### Mobility Features

- Four-wheel chassis
- Steering handle
- Trailer-mounted option

### Power & Control

- Portable gasoline generator power
- Diesel generator options
- Additional power outlet terminal
- Optional remote control

### Safety & Stability

**1 Person**

Operator Requirement
