

Mobile Light Tower with Telescopic Mast

This mobile light tower features a telescopic mast that extends to 9 meters. It is equipped with high-pressure aluminum lamps and a heavy-duty winch for easy operation.

Overview

High-Intensity Portable Illumination

The 4000W Manual Light Tower is a robust, trailer-mounted lighting solution engineered for demanding environments such as construction sites, emergency response operations, and outdoor events. Featuring a telescopic mast with a manual crank system, it allows for precise, adjustable height positioning to maximize light coverage. Powered by a reliable diesel generator, this unit provides extended operational runtime and consistent performance in remote locations.

Total Power

General Specifications

Design Type	Trailer-mounted mobile light tower
Mast Mechanism	Telescopic mast with manual crank system
Suitable Applications	Construction Sites, Emergency Response, Outdoor Events, Remote Operations

Power System

Key Operational Features

- Extended operational runtime
- High-output lamp array
- Durable, weather-resistant construction
- Easy transport and deployment

Power Source	Diesel Generator
