

Mobile Lighting Tower

This mobile lighting tower provides temporary illumination for various applications. It features high-intensity lamps mounted on a 360-degree rotating, adjustable mast and is mounted on a wheeled chassis with a footbrake for easy maneuverability.

Overview

Mobile Lighting Tower Overview

The CLT-04-2 is a versatile mobile lighting tower engineered for reliable temporary illumination in demanding environments such as construction sites, outdoor events, and emergency response zones. Equipped with a high-performance engine and a stable generator, this unit ensures consistent light output. Its adjustable three-stage mast design allows for optimal height and light distribution, while the wheeled chassis provides the mobility required for quick deployment.

Performance

Rated Output

3.6 kW

Power Output

2000 W

Total Lamp Output

Technical Specifications

Engine Type	HONDA GX270
Generator Model	EC4000CX
Voltage	110-240 V
Frequency	50/60 Hz

Physical Dimensions

Mast Stages	3
Maximum Tower Height	5 m
Storage Dimensions	1180 x 935 x 1980 mm
Weight	335 kg
