

Mobile Lighting Tower

This mobile lighting tower has a steering handle and foot brake for easy and convenient moving. The 360-degree rotating mast allows for light adjustment while raised.

Product Overview

High-Performance Mobile Lighting Solution

The CLT-04-4 mobile lighting tower is engineered to provide reliable, high-intensity illumination across diverse job sites and outdoor environments. Featuring a robust, wheeled chassis for enhanced mobility, this unit is designed for rapid deployment and easy positioning. Equipped with a powerful engine and a multi-stage mast, it delivers consistent lighting coverage to ensure safety and productivity during night operations.

Power & Performance

Engine Type	GX270
Generator Model	EC4000CX
Power Output	3.6 kW
Voltage	110-240V
Frequency	50/60 Hz

Lighting & Mast

Mast Stages	3
Maximum Tower Height	5 m
Lamp Output	400W x 4

Physical Specifications

Weight	335 kg
Storage Dimensions (LxWxH)	1180 x 935 x 1980 mm
