

Mobile Phone Accessory Mounting Bracket

This mounting bracket is designed for mobile phone accessories. It features multiple circular cutouts and mounting points for secure attachment.

Product Overview

Precision Mounting Bracket

This mobile phone accessory mounting bracket is engineered for secure and stable component integration. Featuring a robust design with multiple mounting points, it ensures reliable attachment for various housing or rotational assemblies. Its precise architecture, including a central bore and concentric circular geometry, makes it an ideal solution for technical applications requiring high-accuracy alignment.

Technical Specifications

Application Compatibility

Mechanical housing • Rotational assembly • Mobile accessory integration

Mounting Type

Bolt-on fastener assembly

Key Design Elements

Concentric circles, Central bore, Multi-point mounting
