

Mobile Phone Bluetooth Audio Receiver

This mobile phone accessory is a compact Bluetooth audio receiver. It features a slider mechanism, metallic finish, and lanyard attachment for enhanced connectivity and portability.

Product Overview

Compact Bluetooth Audio Solution

This versatile Bluetooth audio receiver is designed to enhance mobile connectivity, allowing users to stream audio wirelessly to non-Bluetooth devices. Its compact, portable form factor includes a convenient lanyard attachment, making it an ideal accessory for on-the-go use. Featuring a durable metallic finish and a tactile slider mechanism, this device combines sleek aesthetics with reliable functionality for professional and personal audio applications.
