

Mobile Platform Ladder for Industrial Use

This mobile platform ladder is designed for industrial and commercial environments. It features a robust construction capable of supporting loads up to 150 kg and includes safety features such as PP+TPR casters and a rubber non-slip base.

Product Overview

Industrial Mobile Platform Ladder

This mobile platform ladder is engineered for heavy-duty industrial and commercial environments, providing a stable and secure solution for elevated work. Built to stringent safety standards, it features a robust load-bearing capacity of 150 kg and integrates user-friendly enhancements such as non-slip rubber bases and specialized casters for mobility. All construction materials are rigorously tested and certified to be free from heavy metals and polycyclic aromatic hydrocarbons, ensuring compliance with international safety and environmental regulations.

Performance & Safety

Max Load Capacity

150 kg

Load Capacity

Certifications & Compliance

ANSI Standard, RoHS Compliant, PAHs Tested, Product Liability Insured

Design Specifications

Key Features

- PP+TPR Casters
- Lifting and lowering converter
- Rubber non-slip base
- Heavy metal-free construction

Step Spacing

305 mm

Model Selection

Technical Specifications by Model

| Model | Steps | Platform Height (m) | Weight (kg) |
|--------|-------|---------------------|-------------|
| HB4911 | 5 | 1.29 | 41.93 |
| HB4912 | 6 | 1.56 | 46.3 |
| HB4913 | 7 | 1.82 | 51.5 |
| HB4914 | 8 | 2.08 | 57.5 |
| HB4915 | 9 | 2.35 | 63 |
| HB4916 | 10 | 2.61 | 68.6 |
| HB4917 | 11 | 2.88 | 78.9 |
| HB4918 | 12 | 3.14 | 85.7 |
