Product Overview

Efficient Bulk Material Handling

This mobile port dust-proof hopper is engineered for the efficient and environmentally friendly discharge of bulk materials, including grain, sand, coal, and cement. Featuring a robust, heavy-duty construction, it is designed to minimize environmental impact during material handling operations. With integrated wheels for easy mobility and positioning, this unit is an ideal solution for port facilities, construction sites, and agricultural material management.

Technical Specifications

Capacity Range

30 m3

Minimum Capacity

70 m3

Maximum Capacity

Environmental Features

Dust-proof construction • Pollution reduction

Mobility System

Wheel-mounted, Mobile Port Design, Easy Positioning

Operational Details

Compatible Materials

- Grain
- Sand
- Coal
- Cement

Applications

Port Facilities, Agricultural Machinery, Construction
