

Mobile Power Generator

This mobile generator provides a reliable power source for various locations. Its durable enclosure offers noise reduction and weather protection, while its robust trailer with wheels and tow bar ensures easy transportation.

Overview

High-Mobility Power Solutions

This mobile diesel generator set is engineered for high mobility and operational safety in diverse environments. Featuring a robust, low-center-of-gravity trailer design, it offers exceptional stability and durability for construction sites, emergency backup, and outdoor events. The unit includes advanced braking systems and adjustable traction frames, ensuring reliable transport and efficient power deployment.

Trailer & Mobility

Suspension System	Leaf spring suspension structure
Traction Frame	Height adjustable latch type
Steering Features	Movable hook, 180-degree dial, Flexible steering

Safety & Braking

Braking Systems

- Inertial driving brake
- Parking brake
- Emergency brake
- Air brake interface
- Manual braking system

Safety Indicators

Steering indicators • Brake indicators • Taillights

Operational Design

Access Points

- Front ventilation windows
- Rear open doors
- Side operator doors

Finish & Exhaust

Feature	Specification
Paint Type	High polymer polyurethane
Exhaust Configuration	Upper or lower exhaust
Support Mechanism	4R mechanical or hydraulic support device

Available Configurations

Available Unit Types

Hand push, Three wheel, Four wheel, Automobile power station, Trailer power station, Low noise, Container power station
