

# Mobile Trailer Generator

This mobile generator provides a convenient power source where grid electricity is unavailable. Mounted on a trailer, it can be easily transported to construction sites, outdoor events, or used for emergency backup power.

## Product Overview

# TRAILER GENERATOR

Portable power solution designed for deployment in various field conditions.

### Mobile Power Solution

This trailer-mounted generator is designed for versatile, high-mobility power requirements in outdoor and emergency applications. Featuring a robust soundproof enclosure and a high-capacity base fuel tank capable of supporting at least 8 hours of continuous operation, it ensures reliable performance with minimal noise disruption. The unit includes integrated safety and mobility features, such as mechanical supporting legs, directional lighting, and specialized braking systems for safe transit and deployment.

## Technical Specifications

### Runtime Capacity

**8 hours**

Minimum Run Time

### Wheel Configuration

Output Capacity	Standard Wheels
Below 100KVA	2 Wheels
Above 100KVA	4 Wheels

## Key Features

# TRAILER GENERATOR

Standard mobile trailer generator unit ready for operation.

### Included Equipment

- Soundproof canopy enclosure
- Base fuel tank
- Four mechanical supporting legs
- Three-side operating platform
- Direction indicator and braking lights

### Optional Accessories

Extra Cable

## Applications

### Primary Applications

Construction Sites • Outdoor Events • Emergency Power Supply • Mobile Power Station
