Product Overview

Mobile Power Excellence

This trailer-mounted diesel generator is engineered for mobile power generation, meeting rigorous road traffic safety standards. It provides a robust, self-contained solution for construction sites, emergency backup, and outdoor projects. The unit features an advanced noise reduction system and is designed for high efficiency, low emissions, and easy field maintenance.

Technical Specifications

Engineered for silent operation and road safety.

Performance Metrics

500 kVA

ESP

450 kVA

PRP

400 V

Rated Voltage

1500 r/min

Speed

Core Hardware

Component	Specification
Engine Model	KTA19-G3
Alternator	HCI544C
Frequency	50 Hz

Operational Features

Safety Systems

Reliable Braking System, Battery Isolator Switch, Detection Monitoring System, Overload Protection, Automatic Shutdown

Acoustic Performance

65 dB(A)

Physical Properties

Mobility Equipment

- Heavy-duty trailer chassis
- Towing hitch
- Stability outriggers
- Durable tires

Total Weight

6500 kg
