

Mobile Worksite Lighting Tower

This mobile lighting tower provides temporary illumination for various applications. It features a telescopic mast, high-intensity lamps, and an onboard generator, mounted on a wheeled trailer with outriggers for stability.

Overview

Self-Contained Illumination Solution

This mobile lighting tower provides a versatile, self-contained solution for temporary or portable illumination needs. Designed for rapid deployment, it features a telescopic mast that elevates high-intensity lamps to deliver wide-area coverage. The unit is fully independent of external power, relying on an onboard generator, and is mounted on a wheeled trailer for easy transport across diverse worksites.

Key Features

Mobility & Setup

- Wheeled trailer for easy transportation
- Telescopic mast for adjustable height
- Adjustable outriggers for stabilization
- Leveling jacks included

Common Applications

Construction Sites, Events, Emergency Response, Remote Work Areas

Technical Specifications

Power Source

Onboard generator

Illumination Capability

Multiple high-intensity lamps
