

Mode 2 EV Charging Cable with Schuko Plug

This is a Mode 2 electric vehicle (EV) charging cable designed for charging electric vehicles from standard household outlets. It features a Type 2 connector for the vehicle inlet and a standard Schuko plug for the power outlet.

Overview

Reliable EV Charging Solution

This Mode 2 electric vehicle charging cable provides a convenient and safe way to charge your vehicle from standard household outlets. Equipped with an integrated In-Cable Control and Protection Device (IC-CPD), it ensures reliable power management throughout the charging process. Designed for durability and safety, this cable meets essential industry standards for performance and electrical integrity.

Technical Specifications

Conductor Configuration	3x2.5mm ²
Voltage Rating	450/750V
Standards Compliance	EN 50620

Features

Charging Mode

Mode 2

Connector Configuration

- Type 2 vehicle connector
- Schuko power plug

Safety Integration

Integrated In-Cable Control and Protection Device (IC-CPD)
