

Modular Hipot Insulation Tester

This modular tester performs hipot and insulation testing. It performs AC withstand, DC withstand, and insulation resistance tests.

Product Overview

Versatile Safety Testing Solution

This modular Hipot and Insulation Tester is designed to perform critical AC, DC, and IR safety tests with high precision. It features patented safety technologies including an ultra-fast DC force discharge mechanism and Smart GFI circuitry to ensure maximum operator protection. Built for industrial environments, it offers flexible integration, including the ability to link up to 100 testers or integrate with Ground Bond testers for a complete rack-mounted safety solution.

Key Features

Integration Capabilities

- Compatible with 7315 Ground Bond Tester
- 19-inch rack-mount configuration
- Link up to 100 testers
- Built-in PLC remote interface

Safety Protections

Smart GFI Circuit, DC Force Discharge, High Voltage Warning, Remote Interlock, Front Panel Lockout
