

Modular LED Display Module with Ventilation

This LED display module features a robust black enclosure with ventilation grills for thermal management. It is designed for modular LED display systems, offering a durable and reliable solution for visual applications.

Overview

Modular LED Display Solution

This modular LED display unit is engineered for professional visual applications requiring durability and reliable performance. Featuring an integrated ventilation system, the module ensures effective thermal management during extended operation periods. Its robust enclosure and built-in carrying handle make it a practical solution for modular display setups that require both portability and high-quality output.

Physical Design

Thermal Management	Integrated ventilation grills
Portability Features	Yes
Enclosure Material/Style	Robust black enclosure

Connectivity

Input/Output Ports	Power Input, Signal Input, Signal Output
--------------------	--
