

Modular LED Floodlight 50-600W

This modular LED floodlight offers a range of wattages from 50W to 600W with efficiency up to 120lm/W. It features 5KV surge protection and multiple optics options for excellent light pollution control.

Product Overview

High-Performance Modular LED Floodlighting

This versatile modular LED floodlight system offers a scalable solution ranging from 50W to 600W, making it suitable for diverse outdoor lighting applications. Engineered with a robust, anti-corrosive powder-coated housing and an integrated IP65-rated junction box, it ensures durability in demanding environments. The design features adjustable vertical angles and multiple optical options to provide precise light control while minimizing light pollution.

Performance Metrics

Luminous Efficiency

120 lm/W

Technical Specifications

Available Wattages

- 50
- 100
- 150
- 200
- 300
- 400
- 600

Ingress Protection

IP65

Surge Protection

5 KV

Optical Features

Beam Angle Options

120*60°, 70*35°

Design & Construction

Key Features

- Modular design for scalability
- Powder coating with anti-corrosion properties
- Vertically adjustable mounting bracket
- Integrated junction box
