

# Modular LED Pendant Lighting System

This is a safe, low-voltage DC24V LED pendant light system designed for modern interiors. Its modular components allow for customized lighting and easy assembly.

## Product Overview

### Modular LED Pendant Lighting System

Enhance your interior spaces with this innovative, modular LED pendant lighting system designed for effortless customization. The user-friendly DIY design allows you to easily choose your layout, rotate the lamp heads, and complete the installation without complexity. Operating on a safe, low-voltage DC24V power supply, this system is perfect for creating bespoke lighting arrangements in both residential and commercial environments.

## Technical Specifications

### Operating Voltage

**24 V DC**  
Voltage

### Key Features

Modular Design, DIY Installation, Low Voltage, Customizable Layout

## Installation & Usability

### Installation Difficulty

Simple and easy; modular components allow for quick assembly.

### Adjustment

Rotatable lamp heads for directional lighting control.
