

Modular Segmented Indicator Light

This combined indicator light features multiple colored segments and a modular design. It is suitable for industrial or control panel applications, providing visual feedback through its illuminated segments.

Overview

AD16-30JC Series Combined Indicator

The AD16-30JC series is a modular, segmented indicator light designed for clear visual feedback in industrial control panel environments. Its flexible design allows for various colored segments, including red, green, blue, yellow, and white, to be configured as needed for specific monitoring requirements. Built with a robust black frame and secure mounting brackets, this indicator ensures reliability and ease of installation in demanding operational settings.
