

Modular Socket Plug Receptacle

This modular socket is used in power distribution systems for homes, hotels, airports, and docks. It can be directly combined with circuit breakers and lighting distribution boxes.

ADDITIONAL IMAGES

Overview

Standard modular socket designed for flexible electrical power distribution systems.

AC30 Modular Socket Receptacles

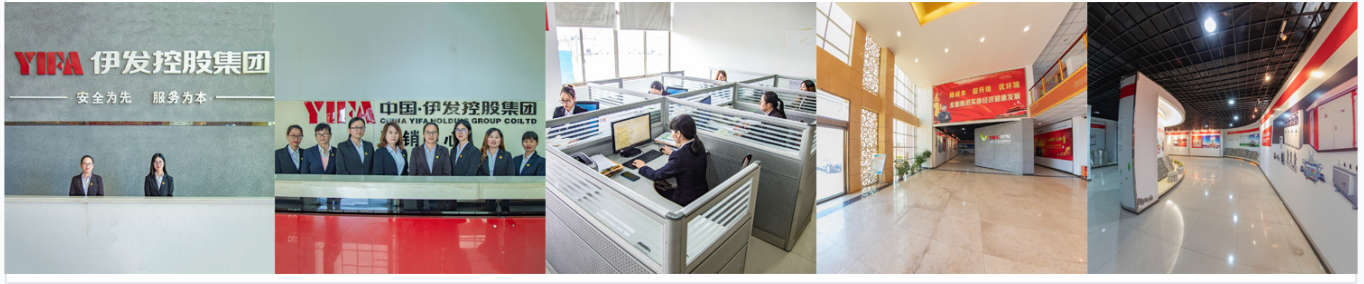

The AC30 series modular sockets are designed for high-performance power distribution in residential, commercial, and industrial settings including hotels, airports, and docks. These units offer a versatile modular design that integrates seamlessly with circuit breakers and lighting distribution boxes. Engineered for safety and reliability, they are fully compliant with international and domestic quality standards.

Standards

Certified Standards

GB2099, IEC60884-1

Technical Specifications

Engineered for reliable electrical connections and safety in demanding environments.

Technical Overview

240 V

Rated Voltage (Single Phase)

415 V

Rated Voltage (Multi-jack)

25 A

Max Rated Current

Model Configurations

Model Type	Current (A)	Voltage (V)	Max Conductor Area
Single-phase two-Jack	10,16	240	≤10
Single-phase three-Jack	10,16,25	240	≤16
Single-phase four-Jack	16,25	415	≤16

Installation

Mounting & Physical

- Modular design for quick integration
- Compatible with DIN rail mounting systems
- Compatible with YFN and DZ47 series circuit breakers
