

Momentary Electric Foot Pedal Switch

This foot switch allows hands-free operation, providing greater control when both hands are needed. It enhances operational control by enabling foot-activated procedures.

Product Overview

Hands-Free Operational Control

This momentary electric foot pedal switch is designed to enhance operational efficiency by allowing hands-free control of machinery and equipment. By freeing up your hands for other procedures, it provides greater control and safety in industrial or laboratory settings. The switch features a robust, nonslip design and provides tactile feedback with an audible click upon activation.

Technical Specifications

Action Type	Momentary
Wiring Configuration	Push-on, Push-off
Tactile Feedback	Yes

Design & Build

Surface Design	Nonslip
Material	Durable Plastic

Certifications

Compliance
CE

Applications

Suitable Applications

- Industrial machinery
- Laboratory equipment
- General electrical instrumentation
- Hands-free control systems
