

Monitor Wide-Angle Lens

This wide-angle lens is designed for use with acrylic or PC monitors. It expands the field of view, allowing a broader perspective of the displayed content.

Product Overview

Wide-Angle Monitor Lens

This wide-angle lens is designed to enhance visual coverage and situational awareness. Constructed from high-quality acrylic or polycarbonate, it provides a durable solution for expanding the field of view. It is an ideal choice for safety and security monitoring in diverse environments such as convenience stores, supermarkets, factories, and parking areas.
